When can I release the ESP to learners?

The ESP is administered to learners during the assessment window which generally opens in March to May and November time

How is the ESP marked and graded ?

The ESP is externally marked by C&G—an overview of how this is marked is covered in the webinar presentation

Q&A

Can learners retake/resit the ESP and if so, when?

Yes there is an opportunity for a resit/retake in another series.

***It is crucial that centres read all the assessment documentations ahead of delivering the assessments.**

What does each task consist of ?

How is the ESP structured, what do learners have to do?

What evidence do I need to provide to C&G ?

All these questions are answered in the webinar presentation

What do we need to do to keep assessment evidence secure?

How long do learners have to complete the ESP?

Overview of the Core assessments for Management and Administration

Learners must complete:

- ***Tasks must be released to candidates in order of sequence and one task at a time
- The time allocated and allocation of marks are not related
- It is the weighting and level of skills being assessed that determine the marks for each task.

Employer Set Project (ESP)

The employer-set project samples content from across the core of the Technical Qualification (TQ). However, due to their importance all versions of the employer-set project will cover content from the following core underpinning knowledge outcomes of specific knowledge and skills for each specialism will be assessed in the practical assignments:

The project is linked to the core skills

- Core Skill A (CSA) Business and commercial awareness
- Core Skill B (CSB) Project Management
- Core Skill C (CSC) Communication
- Core Skill D (CSD) Working collaboratively with others
- Core Skill E (CSE) Applying a logical approach to problem solving

Assessment overview:

The project only draws on the content from the common core knowledge and skills content that sit across all core modules for the Management and Administration common core.

Learners will be marked on the quality and accuracy of the written work they produce.

Ensure core skills from the handbook are embedded in delivery:

- Core Skill A (CSA) Business and commercial awareness
- Core Skill B (CSB) Project Management
- Core Skill C (CSC) Communication
- Core Skill D (CSD) Working collaboratively with others
- Core Skill E (CSE) Applying a logical approach to problem solving
- Maths, English and digital skills

The skills column in the handbook identifies where these skills can be developed

2.7 Team working and **methods of working** as part of a team.

Range:

Methods of working - Different communication methods, different learning styles, team roles, use of collaborative working to achieve results and shared goals, the types of organisation function each team member could be responsible for.

What do learners need to learn?

The different types of teams and collaborative groupings that exist in organisations and the reasons for setting up a team, including temporary teams for a project, full-time working teams that involve different functions and stakeholders, and remote/dispersed teams that operate across multiple locations.

The different roles in a team, the importance of working as part of team and the benefits to individuals and the organisation of team working. The impact of team dynamics on team success.

Belbin's model of team roles. The different roles described, and how the different roles support team working within an organisation.

The impact any conflict in the team can have on the project/organisation and ways to resolve any conflict in a team.

- Accuracy of work is marked (handwriting)
- Don't let learners use a felt pen (blue or black ball point only)
- If handwriting is difficult to read use print/capitals.

- Learners have 20 minutes to present their findings and 10 minutes to respond to 3 questions
- No access to internet
- Candidates' completed project plan-on-a-page from task 1.3 should be used by the Tutor as part of this task to help to inform the questioning after the presentation.

Task 1.4 – Presentation (continued)

(please refer to centre guidance for full explanation)

- The presentation should be presented by candidates individually (not in a group).
- Bullet points
- Given within the presentation tutor needs to assume role of ‘the audience’ and will need to ask three questions that are contextualised to the candidates’ presentation .
- Its good practice for the question asker to note the questions asked and the candidates’ responses (backup).
- It’s recommended a second member of staff is available to support with the recording of the assessment, ensuring video equipment is working and the visual and sound is being captured
- Crib sheet for presenting e.g. name—subject- eye contact-projection of voice microphone.

- An evaluation account (approximately 1000 words).

Task specific requirements:

- Learners can structure their evaluation account in the way they feel is most clear and appropriate.
- Use of the Internet is not permitted

Hints and Tips:

- What went well—what didn't go so well and what would you do differently next time? (Include how to improve)
- Learners could write about each task separately or at the end as one summary account
- Make sure learners link their evaluation to the tasks and project brief.
- Make sure learners don't just give a task-by-task explanation instead of an evaluation of their work.

A City & Guilds Group Collaboration

Security of Assessments

- There is specific guidance within the centre and candidate guidance pack relating to this
- Candidate evidence must be kept secure to prevent unsupervised access by the candidate or others
- Where evidence is produced over a number of sessions, the tutor must ensure candidates and others cannot access the evidence without supervision
- This might include storing written work or artefacts in locked cupboards and collecting memory sticks of evidence produced electronically at the end of each session.

Example of marking for task 2.2

Task 2.2 – Evaluation

Indicative content

Typical evidence may include:

Content

- Reflection on effectiveness and success of responses across project tasks
- Considered analysis and evaluation of project outcomes and detail of whether all project outcomes were achieved.
- Evaluation of project brief documents showing knowledge of the full project lifecycle including its closure phase.
- Lessons learned – An evaluation of task responses indicating what was successful and the reasons why, and what different steps may be taken next time to make future projects more successful.
- Evaluation and self-reflection of own abilities to manage project objectives and outcomes, including detail of how the chosen proposed technology solution and project planning for its implementation met the requirements of the charity organisation as detailed in the project brief.

Skills

- Effectively evaluate own performance and behaviours
- Ability to be able to reflect on own experience and articulate what they have learnt

Guidance for markers

The following evidence must be used to assess performance against this task.

- Written summary statement

Note, where guidance has been provided on an approximate word count for the written summary statement, this is for guidance to learners only. There is not a requirement to award marks based on the word count, but instead the response should be marked based on the quality of response.

Note: where there is insufficient evidence to award a mark, a zero mark may be given

Example breakdown of AOs and marks for 2.2

Note: where there is insufficient evidence to award a mark, a zero mark may be given	Band 1 descriptor			Band 2 descriptor			Band 3 descriptor			Band 4 descriptor			Band 5 descriptor			AO	Total marks available
Task 2.2	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	AO2b	15
Evaluation	An attempt is made to evaluate the project outcome. Brief commentary is provided to state if the brief was or wasn't met. Brief detail is provided on how the project outcome linked to the requirements of the brief, with a limited attempt to identify reasons.			The evaluation addresses how well the project outcome was achieved. There is an attempt to provide some reasoning and justification as to how well the brief was met. Detail provided on how the project outcome linked to the requirements of the brief with some reasons outlined.			The evaluation is detailed and addresses how well the project outcome was achieved. There is a good level of reasoning and justification provided on how successfully the project brief was met. Detail provided on how the project outcome linked to the requirements of the brief with reasons explained.			The evaluation is detailed and specifically addresses how well the project outcome was achieved. There is a thorough level of reasoning and justification provided on how successfully the project brief was met, and the degree of effectiveness of the approach. Detail provided on how the project outcome linked to the requirements of the brief with thorough explanations of reasons.			The evaluation is comprehensive and specifically addresses how well the project outcome met the requirements of the brief. There is a comprehensive level of reasoning and justification provided that successfully and effectively explores how the project brief was met, and the degree of effectiveness of the approach. Detail provided on how the project outcome linked to the requirements of the brief is explained in comprehensive detail, with a focus on the level of effectiveness.			AO5a	
	A brief attempt is made to reflect on own personal performance and behaviours. There is limited consideration of any lessons learnt.			Some self-reflection points on own personal performance and behaviours are evident within the evaluation, with some attempt to link performance with lessons learned.			A good overview of self-reflection on own personal performance and behaviours and learnings from the task are evident through the evaluation, with links articulated between performance and lessons learned.			A thorough overview of self-reflection on personal performance and behaviours and learnings from the task are evident through the evaluation, with links articulated between performance and lessons learned, with suggestions on how different steps may be taken in future projects.			A comprehensive overview of self-reflection on personal performance and behaviours is evident through the evaluation and link clearly and coherently to the project outcome with links articulated between performance and lessons learned, that effectively detail how different steps may be taken on future projects and why.			AO5b
