About this manual

Price: Email digital.solutions@cityandguilds.com for details. Product code: SS9325-9320.

This manual contains a range of practical tasks which allow apprentices to apply their knowledge and skills.

The tasks are mapped to the Maintenance and Operations Engineering Technician (MOET), Engineering Operative, Engineering Fitter and Engineering Technician apprenticeship standards and have been devised to prepare apprentices for the requirements of their end-point assessment. Each task contains the following features:

- **information** about the practical activity that enables apprentices to practise a particular skill.
- **detailed instructions (including technical drawings if required)** to support apprentices with their practical activity.
- **an opportunity for apprentices to reflect on their learning** and for employers and trainers to provide feedback.

Appendices are included, providing additional information to support the apprentice in completing the tasks.

The tasks should cover all the skills and behaviours required for the apprenticeship and can be completed in any order.
