About this manual

This form-fillable PDF training manual aligns directly to the Level 2 Plasterer apprenticeship standard and offers coverage of the key skills. It is the essential practical resource for apprentices and can be saved electronically. This manual provides apprentices with a series of practical tasks to support their learning experience.

These practical tasks are divided into solid plastering and fibrous plastering specialisms, and are designed to reflect the full range of skills that learners will need to master to succeed in their learning as well as in the workplace

This manual includes 29 work-based tasks that have been mapped to the apprenticeship standard and are designed to prepare learners for the requirements of their end-point assessment.

Throughout the manual, employers can record constructive feedback that learners can use for their development.

Each task includes:

- planning sections for learners o cover what tools, equipment (including PPE) and resources they'll need to complete the task successfully
- a risk assessment for learners to fill out to ensure safe completion of work
- a step-by-step guide with detailed working drawings so learners know how to complete the task to the required specifications
- a space for learners to reflect on how the task and what they need to work on in the future.

The tasks should cover all the skills and behaviours required for the apprenticeship but the tasks do not need to be completed in the order given in the manual. Employers and training providers should feel free to assign the tasks in any order.

The tasks in this manual will also be available on Learning Assistant, City & Guilds' e-portfolio solution. Subscribers to the SmartScreen package may use the files on any e-portfolio of their choice provided that the SmartScreen subscription is maintained.
