Resources

This form-fillable PDF apprenticeship training manual aligns directly to the Gas Engineer standards and provides coverage of all the key skills. It supports learners training to be gas engineers and can be saved electronically.

This manual provides learners with a range of practical tasks to apply their knowledge and skills in preparation for assessment. The manual is designed to support formative learning, by allowing the learner to track their progress. A feedback sheet for tutors/trainers to complete is also included at the end of the manual.

The tasks are split into three sections:

- Tasks related to gas skills
- Combined tasks, incorporating gas and plumbing skills
- Stretch and challenge tasks, for learners who have mastered the core skills.

Although many of the tasks are standalone, some of the combined tasks are designed to integrate into one larger task, providing learners with an opportunity to work with more complex installations.

Each task has the facility to record the time taken to complete, to enable tutors/trainers to monitor guided learning hours (GLH) where required.
